Location: Oak Brook, IL

Product Type: Golf Course Clubhouse Facility Renovation

Services: Architecture

Addition Size: 1,678 sf

Total Clubhouse size: 48,163 sf

Butterfield Country Club is committed to enhancing the member and guest experience. Throughout its storied history, the club has completed numerous additions and renovations. BSB Design helped renovate the library and lounge areas first. Then the club's primary casual entertainment venue received a major redesign and rebuild. The updated patio features shaded seating and fire pits overlooking the beautifully manicured golf course. The indoor bar and restaurant now have an immediate connection to the main entrance and merchandise storefront, intended to raise sales. Vertical and horizontal elements reflect the Tudor-style design of the original clubhouse. A beautiful, vaulted clerestory fills the space with natural light and creates a unique element as a focal point for the pub, both indoors and out.
