

CONTEMPORARY CUSTOM LAKE HOME

Client: Private Homeowners
Location: Lake Geneva, WI
Product Type: Custom Single Family Home
Services: Architecture
Size: 5,543 sf

Although the site presented several challenges, including reuse of the previous home's foundation, this contemporary custom home design led to something truly spectacular. Floor-to-ceiling windows and private outdoor spaces on each floor highlight the views of Lake Geneva from multiple vantage points. Overhead beams lead outward from the kitchen to those lake views, and additional use of dark wood throughout the home creates contrast that balances the light and openness of the interior spaces. Outside, the unmistakable modern roofline, materials and colors set the stage for a unique experience.
