

GLEN OAK GOLF CLUB RENOVATION

Client: Glen Oak Golf Club

Location: Glen Ellyn, IL

Product Type: Golf Course Clubhouse Facility Renovation

Services: Architecture

This beautiful country club first opened in 1911 and was due for a few updates. Our design maintained the integrity of the original while adding some much-needed functional space. The patio area now has resort-style fire pits and seating, along with a large dining area and more efficient access from inside. The pool area was expanded to include plenty of lounge seating, and the floor plan design provides immediate access to concessions. Overall, the improved street presence and more functional layout will improve the guest experience, giving this historic club the boost it needed to increase traffic and revenue.
