The Luxe Collection was developed as a solution for clients who desire a fully custom home but with the convenience of an established production program. Many of the plans incorporate design elements that were customer-inspired. Exterior elevations feature traditional architectural styles, including Spanish, Old World, French Eclectic and Tudor. All plans focus on connectivity to the outdoors, with room arrangements that ensure openness and livability. Fluid layouts are relaxed in nature, but the detailing and space allocation retains a high level of sophistication to satisfy any custom home buyer.
